Subject: [External] Village of Peotone - additional pipe testing

David,

Per your request, we were able to find additional homes to harvest copper pipe with lead solder in the Village of Peotone. We used three homes in the community and were able to harvest 9 pipes from the three homes to finish the testing in Peotone to prepare for the water switch over. Some of the harvested pipe was pre-softener and some was after the softener. We will setup 8 of these 9 pipes from the three homes to test 4 pipes with Kankakee water and 4 pipes with Kankakee water with 2 mg/L orthophosphate. We will keep track of the data as per which home the pipe came from and whether the pipe was before or after a softener. In addition, we have 4 pipes being tested from the Peotone City Hall.

If you have any questions on the additional testing, please let us know.

Thank you,

Melissa Kahoun
